MUMR mixed reality: line-up spot 1

Press Line up on your panel. Put an index fingertip on the dot and hold it still until the ring is full. Both players do this, here first.

Tape the sheet down: it must not move between the two players. Any marked spot on the floor works as well.

MUMR mixed reality: line-up spot 2

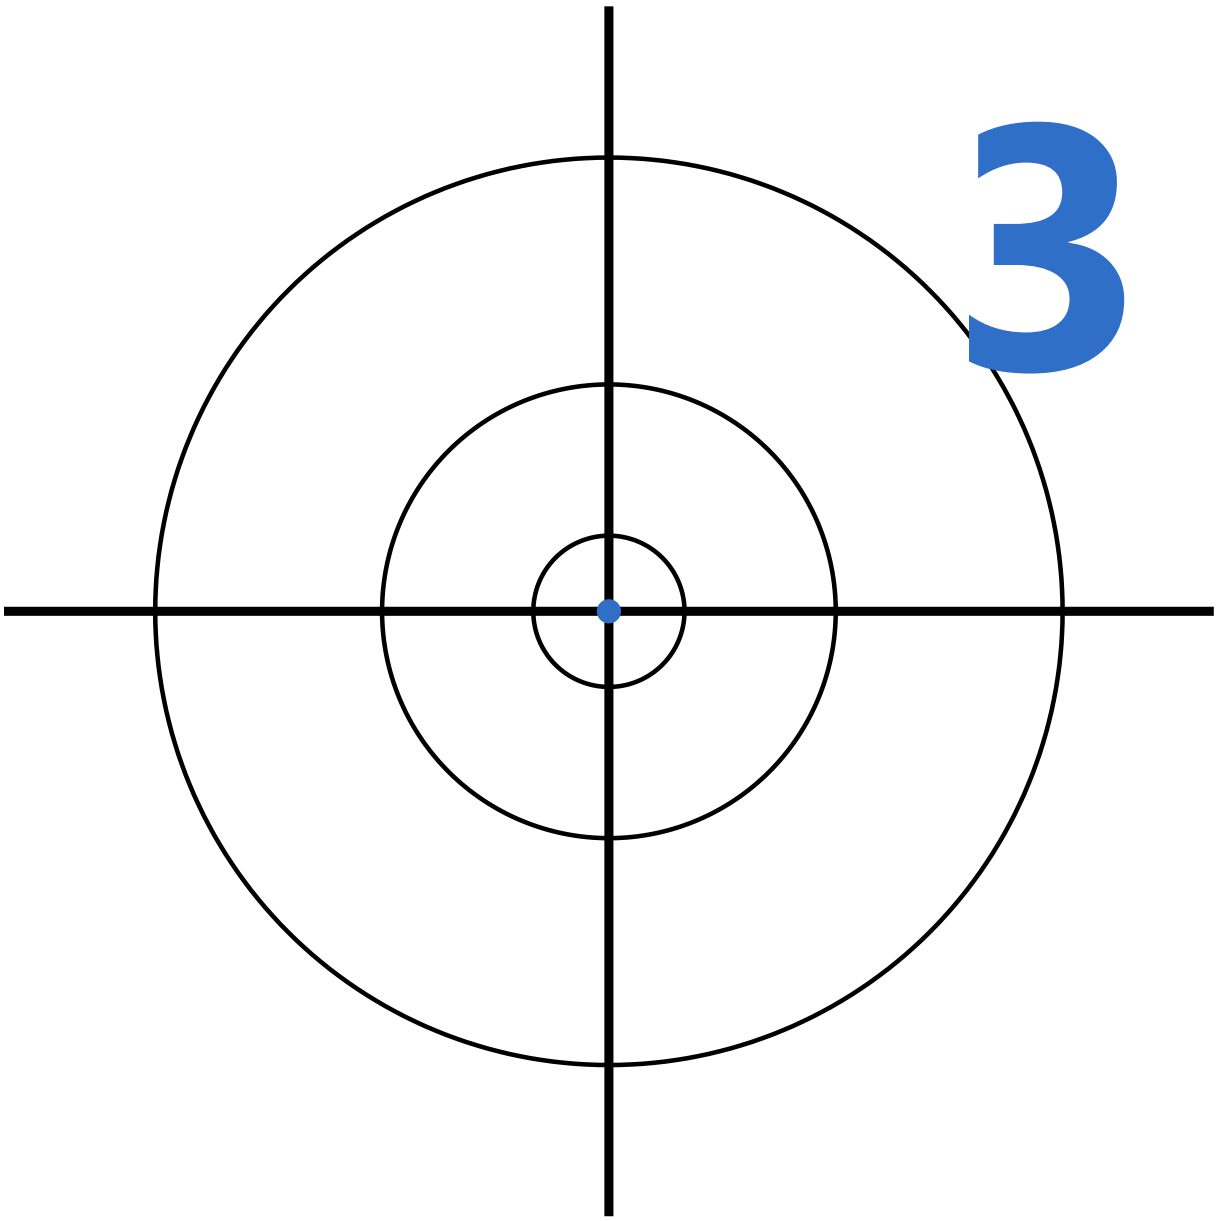

Lay this sheet 1.5 to 2 m from sheet 1: the further, the better the two rooms agree.

Both players hold a fingertip still on the dot, after spot 1.

Tape the sheet down: it must not move between the two players. Any marked spot on the floor works as well.

MUMR mixed reality: check spot 3

Lay this sheet anywhere else, a metre or more from sheets 1 and 2.

One player presses Line up again and holds a fingertip on the dot: a mark appears.

The other player looks: the mark should sit on this cross. If it does not, pinch one of your own marks at spot 1 or 2 and move it until it does.

Tape the sheet down: it must not move between the two players. Any marked spot on the floor works as well.

MUMR mixed reality: field of view

Field-of-view sheet for the webcam page.
Print it at 100 % (no fit to page) and check that the bars are 100 mm long.

In the webcam panel press Measure field of view.
Hold this sheet 0.4 to 0.8 m in front of the camera, leaning back
(its top edge further from the camera than its bottom edge), and keep it still:
the page takes a picture of it by itself.

A yellow outline on the screen shows where to put the sheet next.
Do this at three to five places.

Hold the sheet by the middle of the long edges, or lean it on something:
the four black squares must stay uncovered.

If the page cannot find the squares, press Measure by clicking
and click their centres in the order of their numbers.

Showing this sheet on a screen (a phone) instead of printing it?
Measure each 100 mm bar as it is shown, between its two end lines,
and enter the two numbers in the webcam panel (Bar shown as).
The outline then fits the screen: hold it close to the lens.

100 mm

The squares are 44 mm. Squares 1 and 2 are 150 mm apart (centre to centre), 1 and 4 are 237 mm apart.
